

WRIGHT
AMERICAN

ELECTRIC WIRE ROPE
HOIST

**2, 3, 5, 7½ AND 10
TON CAPACITIES**

Made with Pride

Our craftsmen and engineers
continue a *Wright* Heritage
spanning six decades of producing
the finest American made hoist . . .
the new *Wright* American Hoist is a
product of that proud heritage.

WRIGHT® AMERICAN

CONTROLS: Choose single or two speed. Magnetic reversing controls mechanically and electrically interlock with 115v control circuit. Time delay fuses and motor thermostat provide both branch

circuit and motor running overcurrent protection. Meets NEC requirements. NEMA Type 3R enclosure. Light-weight, durable deep-drawn for easy access.

TROLLEY WHEELS: Forged steel with machined and hardened treads complete with pre-lubricated, sealed for life, heavy duty ball bearings.

MOTOR BRAKE: Job proven rectified D.C. magnet-actuated disc brake stops rapidly with minimum to zero drift. Separated from the gear housing for rapid cooling, the multiple coil brake's exclusive brake-sensing switch prevents the motor operating against the brake, should a brake adjustment be necessary.

MOTOR: 30-minute duty motor with standard NEMA flange Class F insulation. Standard single speed motor reconnects for 230 or 460v, 3 phase, 60 hertz. Standard NEMA shaft extensions.

WIRE ROPE: Pre-formed wire rope, made of either improved plow steel with a fiber core or extra improved plow steel (XIP) with a steel center, has swaged fittings on both ends.

HOOK: Drop forged heat-treated steel hook swivels 360° on a shielded roller thrust bearing and comes equipped with a spring latch.

DRUM: Machined grooves and large flanges provide smooth winding and extended rope life. Two full turns of rope remain on the large diameter steel drum at lowest hook position.

GEAR TRAIN: Oil-tight housings enclose the quiet, compact, helical gearing and the external spur drum gear. Machine cut, heat-treated alloy steel gears have shock resistant ductile cores. Designed to AGMA standards, gearing operates in an oil bath. Rugged aluminum alloy housing rapidly dissipates heat.

MECHANICAL LOAD BRAKE: Automatic Weston-type multiple disc brake holds full load independent of the motor brake. The brake controls load acceleration while being lowered. Requires no wear compensation adjustment.

BEARINGS: Precision heavy duty ball bearings support all shafts. Bearings splash lubricated or life-time pre-lubricated and sealed.

ELECTRIC WIRE ROPE HOISTS

The Wright American hoist line combines the engineered durability of custom specified hoists with the price and delivery of "off-the-shelf" products. Using high volume Wright parts and components, parts with years of job proven dependability, creates cost saving production efficiencies. The result is a high quality line of hoists, built with pride and engineering excellence, at very competitive prices.

STANDARD FEATURES

- 2, 3, 5, 7½ and 10 Ton Capacities
- H-4 Duty Class
- Low Headroom
- Two Part Double Reeving—2, 3 and 5 Ton; Four Part Double Reeving—7½ and 10 Ton
- Lug, Plain Trolley or Motorized Trolley Suspension
- Mechanical Load Brake
- Helical Gearing on High Speed Shafts
- Spur Gearing on Drum Shaft
- D.C. Disc Brake
- Single Speed Motor
- NEMA 3R Enclosure
- Minimum End Approach
- Competitively Priced
- 2 to 4 Weeks Delivery
- Complies with ANSI B30.16 and ANSI/ASME HST-4M Specifications

WARNING: Equipment described herein is not designed for, and should not be used for, lifting, supporting, or transporting humans.

for lifting, supporting, or transporting humans. Modifications to upgrade, rerate, or otherwise alter the hoist equipment shall be authorized only by the original equipment manufacturer or qualified professional engineer.

Failure to comply with any one of the limitations noted herein may result in serious bodily injury.

3 & 5 TON GEARED TROLLEY 6 WHEEL

7½ & 10 TON GEARED TROLLEY 6 WHEEL

OPTIONAL FEATURES

- Upper & Lower Geared Limit Switches
- Trolley Motor Brake
- Mainline Contactor
- Two Speed Motor—15/8 FPM or 12/6 FPM
- Trolley with ACM (Acceleration Control Module) or Ballast Resistors
- Thermal Overload Relays
- NEMA Type 4 or 12 Enclosures
- Optional Trolley Speeds —
32 FPM on all Models and 32 & 125 FPM on
2 & 3 Ton Capacities
- Operation on Patented Track
- Extra Push Button Stations
- Optional Paint Colors Available

MODEL NUMBERING SYSTEM

A special model numbering system has been devised to facilitate ordering your choice of *Wright American* hoist with standard or optional features.

- ① PRODUCT: A = *Wright American*
- ② FRAME: 2 = Series 32, 3 = Series 33
- ③ REEVING: L = Single, H = Double
- ④ Capacity in 1000 lbs.:
X2 = 250 lbs.
X5 = 500 lbs.
01 = 1000 lbs.
02 = 2000 lbs.
- ⑤ LIFT SPEED: Catalog FPM
- ⑥ SPEED TYPE: S = Single, T = Two
- ⑦ LIFT: Catalog Foot
- ⑧ SUSPENSION: L = Lug
P = Plain Trolley
G = Geared Trolley
M = Motorized Trolley
1 = 3 Pin Lug or 6 Wheel Trolley Arrangement

Example: A3H1512T25M is a *Wright American* hoist, series 33 frame, with double reaving, 7½ ton capacity, 12 FPM lift speed, optional two speed non-reconnectable motor, 25 ft. lift and a motorized trolley.

2 TON LUG MOUNTED 2 PIN

2 TON MOTORIZED TROLLEY 4 WHEEL

3 & 5 TON LUG MOUNTED 2 PIN

3 & 5 TON MOTORIZED TROLLEY 4 WHEEL

Standard trolley travel speed is 65 FPM
Trolleys are adjustable for Standard I beams, 4 inch to 8 inch flange widths
Beam size must be specified. Trolleys are also available for 3.25 or 3.33" patented track beams.

Trolleys for WF beams are available on application.
All references to beam flange widths are for clearance purposes only and do not imply that lower flange of beam will support hoist with load.
All dimensions in inches.
(a) Note: Wheel and pin loads do not include impact loads.

RELY ON YOUR **WRIGHT®** DEALER FOR:

QUALITY PRODUCTS: Your *Wright* equipment distributor represents a large group of the nation's best known manufacturers. He handles a wide range of fine product lines—giving you one local source for most all your industrial supply needs.

FAST DEPENDABLE SERVICE: Your *Wright* Dealer stands ready to furnish you with required delivery. In most cases, he is prepared to give you emergency service when it's necessary.

TECHNICAL SUPPORT: Experienced *Wright* Dealers are knowledgeable and fully equipped to answer questions you may have about *Wright* equipment. The dealer organization is strongly supported by factory representatives and strategically located warehouses, parts and repair centers. Product application data is yours for the asking. Your *Wright* Dealer can bring in factory trained service specialists quickly to help you with your specific problems.
